HYBRID MEETINGS

We'll bring your live events into line with the demands of the time!

Hybrid is here to stay

At the Austria Center Vienna we're all about communications that hit the mark. Thanks to innovative solutions that are geared towards full interactivity, you too can engage with your target audiences any way you want – online, in person and by networking participants with each other in a hybrid format. Our individual settings for hybrid events give you genuine planning security for affordable events, whatever the size.

Hybrid event a great opportunity

Straightforward switching to and from external feeds makes it easier to attract top-quality speakers, wherever they may be. Using digital event solutions allows you to reach out to an

even broader audience – and makes it easier to analyse the impact of your event.

Interacting and networking

Hybrid events open the door to a dynamic communication experience for your participants by including opportunities for moderated interaction such as ballots, live Q&As and chats – in person and online.

The perfect IT set-up for outstanding events

Our world-class technical meeting infrastructure earned us an award a little while back. High-performance network infrastructure makes live patch-ins even easier, while facilitating lag-free dialogue whatever the distances involved.

Rooms to grow ideas.

Three hybrid networking options

Hybrid Circle

A fully equipped 360° studio with cameras, projectors for live feeds, professional lighting, extended get-together area and everything you need to transform your event into a digital communication experience for participants at the venue and online.

Hybrid Sphere

Our starter package lets you fully digitalize your event. Through panels, lighting elements and various ways of incorporating external speakers, the Hybrid Sphere can be scaled according to the specific format – from exclusive get-togethers to major presentations.

Hybrid Cube

A booth-sized studio is just the ticket for discussions with smaller live audiences on site. The end-to-end technical equipment provides a professional set-up for internal and external interactions.

We can't wait to see you!

Add-ons: Custom hybrid solutions

Green screen studio

The green multipurpose solution for every presentation: A freely configurable space can be populated with any kind of visual content, or post-edited once the event has finished.

LED wall

Available in all halls: dynamic backgrounds displayed on high-quality LED walls – for impressive and attention-grabbing effects.

Broadcast studio

Studio with the VIP touch: the place where hybrid events are given that extra special level of finish through the addition of custom content or material such as interview footage.
